

Forklift Electrical Part

Forklift Electrical Parts - Forklifts could be specifically labeled to be used in dangerous locations. A marked forklift denotes the design has met the lowest standards of ANSI/UL 558 for engine powered lift trucks or ANSI/UL 583 meant for electric forklifts for the type of label placed.

The application for labels intended for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance provider and Fire Marshall for further info about the approved uses of industrial powered trucks in your application.

If the specific lift truck satisfies the outlined standards, labels may be attached. A labeled forklift would show the type of designation placed on the nameplate and will have a correctly corresponding label attached.
